Professional Summary

Software development professional with hands-on internship experience in full-stack web development using Java, Spring Boot, React, REST APIs, and databases. Experienced in building web applications, integrating backend services, and developing AI-powered agents for job search automation, referral outreach, and resume customization. Seeking entry-level Software Engineer or Java Full-Stack Developer opportunities to contribute to real-world software solutions.

Internship Experience

Isthara Parks Private Limited *May 2026 – Oct 2026*
Trainee Software Engineer Intern Hyderabad, Telangana

- Assisted in developing full-stack web applications using React and Spring Boot, contributing to frontend components, backend logic, RESTful APIs, and database integration.
- Supported API integration, feature implementation, and application debugging to improve communication between frontend and backend components.
- Used Git for version control and collaborated on development tasks following team workflows and software development practices.

Projects

PG Made Eazy *Jan 2026 - Apr 2026*
Full-Stack Web Application | React, Spring Boot, MongoDB Live Demo

- Developed a full-stack PG accommodation platform that centralizes property discovery, listing management, and booking workflows, addressing the fragmented process of finding and securing paying guest accommodation.
- Built responsive React interfaces and Spring Boot REST APIs, integrating MongoDB for persistent data storage and JWT-based authentication to support secure, role-based access for seekers, property owners, and administrators.
- Integrated PayPal payment functionality and an administrative dashboard to streamline booking-related transactions and property approval workflows.

CreatorSphere *Aug 2025 - Dec 2025*
Creator–Brand Marketplace | MERN Stack, Cloudinary, JWT Live Demo

- Developed a full-stack creator-brand marketplace to simplify influencer collaborations and brand partnerships.
- Built responsive React.js interfaces with Tailwind CSS, Node.js, Express.js, and MongoDB for full-stack functionality.
- Implemented marketplace workflows to facilitate creator-brand interactions and streamline collaboration management.

AI-Powered Job Search Agents *Oct 2026 - Present*
Browser Automation and AI Agents GitHub

- Built a LinkedIn referral agent to identify relevant professionals and automate personalized referral outreach workflows.
- Developed a Naukri job application agent to streamline job discovery and automate application workflows based on defined search criteria.
- Created an AI-powered resume tailoring agent to analyze job descriptions and customize resume content to highlight relevant skills, experience, and qualifications.

Technical Skills

- **Programming Languages** : Java, Python, JavaScript
- **Web Development** : React.js, Spring Boot, REST APIs, HTML, CSS
- **Databases** : MySQL, MongoDB
- **Core Concepts** : Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), DBMS, SDLC
- **AI Tools** : AI Agents, GitHub Copilot, Cursor
- **Developer Tools** : Git, GitHub, Swagger

Education

B.Tech. in Computer Science and Engineering (Data Science) *2022 – 2026*
Malla Reddy University, Hyderabad CGPA: 8.85/10

Senior Secondary (Class XII) *2020 – 2022*
Telangana State Board of Intermediate Education (TSBIE) Percentage: 97%

Certifications

- **Design and Analysis of Algorithms** – NPTEL
- **Introduction to AI Agents** – Mercor

Additional Experience

Freelancing
Web Development and Video Editing

- Developed websites and web applications, including online menus and informational websites, based on client requirements.
- Created video edits and promotional digital content for social media and marketing use cases.
